The Funding of Scientific Racism

Wickliffe Draper and the Pioneer Fund

WILLIAM H. TUCKER

"Until his death in 1972, Draper provided millions of dollars, both through the fund and independently of it, for 'scientific' studies of race and for campaigns against racial mixing. William H. Tucker's book is the first comprehensive history of those efforts. . . . [His work] yield[s] a plausible account of a socially dark and intellectually perverse fragment of American conservatism."

—*Journal of American History*

304 pp. 6 x 9. Paper 978-0-252-07463-9. \$20.00

The Science and Politics of Racial Research

WILLIAM H. TUCKER

Shows how, for more than a century, scientific investigations of supposedly innate differences in ability between races have been used to rationalize social and political inequality as the unavoidable consequence of natural differences.

384 pp. Cloth 978-0-252-02099-5. \$39.00. Paper 978-0-252-06560-6. \$27.00

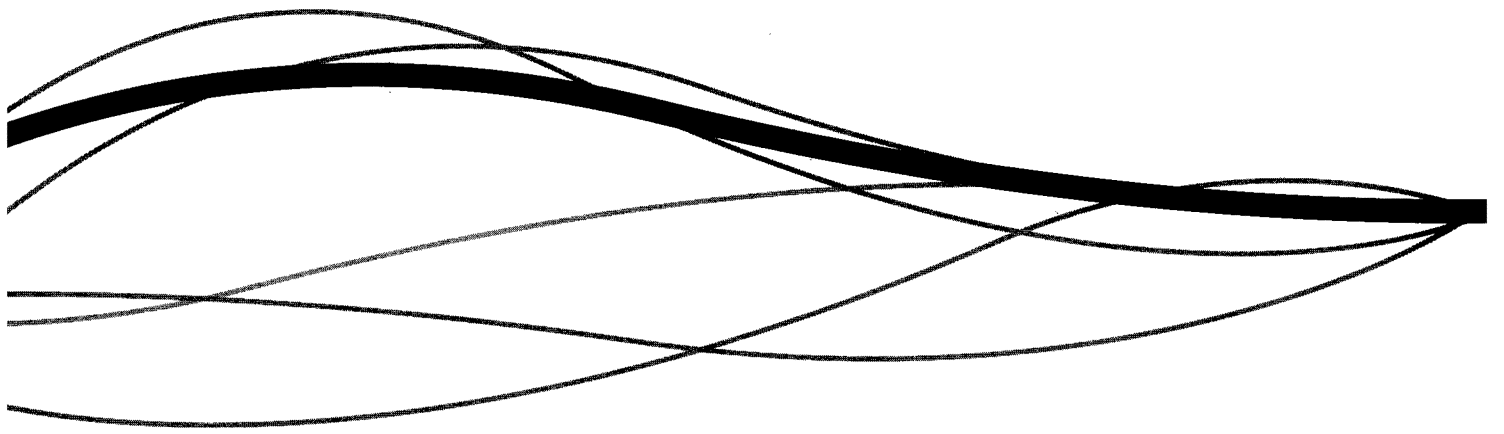

Winner of the Anisfield-Wolf Award. Winner of the Ralph J. Bunche Award, American Political Science Association. Named Outstanding Book by the Gustavus Myers Center for the Study of Human Rights in North America.

Towards Moral Science

The Cattell Controversy

Race, Science, and Ideology
WILLIAM H. TUCKER

“In analyzing one of the most important controversies in contemporary psychology, Tucker explores a number of important moral issues and shows himself to be a master of ethics as well as history, making judgments only after a meticulous examination of all sides of the issue.”

—**Barry Mehler**, founder and executive director of the Institute for the Study of Academic Racism

“With the meticulous research that also characterized his previous work, William H. Tucker has carefully dissected and discredited the claim that the scientific and moral/political projects of psychologist Raymond B. Cattell belonged to separate spheres. Cattell’s own words, presented in context by Tucker, show just how important race and eugenics were to Cattell, not just before World War II, but throughout his long career. The lucid, critical account of Cattell’s factor analytic work on personality and the detailed context of postwar scientific racism make this an important work for understanding the interplay of science and ideology.”

—**Andrew S. Winston**, editor of *Defining Difference: Race and Racism in the History of Psychology*

272 pp. 6 x 9. 2 tables. 2009. Cloth 978-0-252-03400-8. \$50.00

Library Recommendation Form

THE
American Journal
OF
Psychology

To: Librarian / Library Acquisition Committee

From: _____

Position: _____ **Dept:** _____

Email: _____

Phone: _____

I recommend that the library subscribe to *The American Journal of Psychology*. Please include this journal in your next serials review meeting with my recommendation to subscribe.

Signature: _____

Date: _____

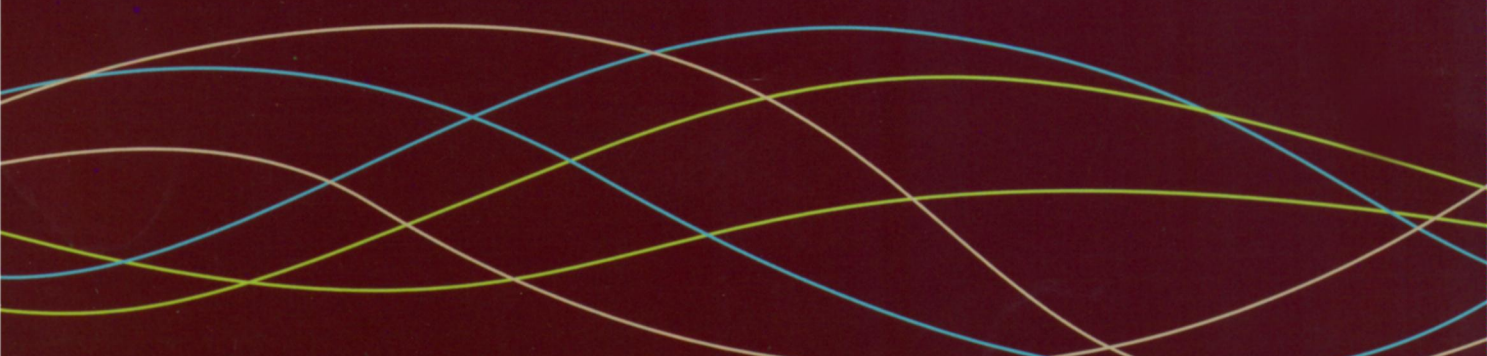

For subscription information please contact the University of Illinois Press online at <http://www.press.uillinois.edu/journals/ajp.html>

NOTES TO CONTRIBUTORS

- You are urged to submit the manuscript and cover letter (a) by e-mail attachment in Microsoft Word (.doc) and (b) one copy of each also by postal mail, printed on both sides of each page. If you are unable to send a submission by e-mail attachment, please send four copies by postal mail. Include complete sets of tables and figures. Please do not send glossy prints. Your cover letter may include the names, institutional affiliations, and e-mail addresses of 2 to 4 recommended reviewers who have not had a collaborative of faculty-student relationship with you.
- Contributors are asked to follow the style described in the *Publication Manual of the American Psychological Association*, 5th ed., 2001, and to consult Appendix A, Checklist for Manuscript Submission, in the *Manual* as a guide.
- *Everything* should be double spaced—abstract, text, references, notes, captions.
- A postal address, telephone number (and e-mail address and fax number, if possible) should be included on the title page.
- Please include all statistical indices, descriptive and inferential, required for evaluation of your experimental findings.
- The abstract should not exceed 960 characters and spaces (approximately 120 words).
- Special mathematical symbols and abbreviations should be identified.
- All elements in a figure should be large enough to be readable when the drawing is reduced to fit the maximum width of 11 cm.
- All titles in the reference list should be spelled out rather than abbreviated.
- References cited in the text should agree with those in the reference list.
- A copy of the letter of permission for the use of previously published material (e.g. long extracts and reproductions of figures) should be included.
- The submitted manuscript should not be under review elsewhere. Authors may order offprints at the time they return page proofs. Authors will automatically receive two sets of tearsheets of their contribution.
